Art Unit: 1794

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8, 10-18 and 20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gundlach et al (5,925,400, col. 19, lines 5-18) in view of Leidy et al (3,840,677, col. 3, lines 30-33 and col. 7, lines 59-65) or Sienkiewicz et al (4,162,332, col. 6, line 54 to col. 7, line 27) as set forth in paragraph no. 5, Paper No. 20071022. Further, spraying a flavoring onto a food product (claims 21, 23, 24) is a conventional technique for applying the flavoring. Additionally, it would have been obvious to add flavor to the fried product in the process of Gundlach et al, as modified by the secondary references, prior to consumption since many consumers of food products flavor their food products with a variety of seasonings and spices immediately prior to consumption.

3. Claims 9 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gundlach et al in view of Leidy et al or Sienkiewicz et al as applied to the claims above, and further in view of Kunert et al or Kazemzadeh as set forth in paragraph no. 6, Paper No. 20071022.

4. Applicant's arguments and attachment filed January 25, 2008 have been fully considered but they are not persuasive. It would be expected for the skilled artisan to flavor a food product from which flavor has been lost during processing. Thus, it would have been obvious to add flavor to the fried product in the process of Gundlach et al, as above modified. Moreover, there is nothing in the instant record which indicates that the

particular order of steps, including flavoring after frying, produces any results which differ from those which would occur from following a different order of steps. As a result, adding flavor prior to frying would allow for some of the flavor, which is naturally lost during frying, to still be present when the turkey bacon product, produced in said process, is ready for consumption.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
